DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:
 - a. It is not clear if layer 13 of Fig. 1 corresponds to the porous layer or the white pigment containing layer. See page 13, lines 6 and 7 of the specification.
 - b. Fig. 2 does not show where the substrate 11 and the image forming layer 14 are located. See page 22, lines 1 and 6.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 5 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear where the porous layer is located in the image recording material.

Allowable Subject Matter

4. Claims 1-4, 6-12 and 14-17 allowed. Koike et al. (US 6,777,039 B2) teaches an ink jet recording sheet comprising a support, a colorant receiving layer, and a white polyethylene layer comprising titanium oxide of a rutile between the support and the

polyethylene layer. Koike does not teach or suggest incorporating an electronic element in the recording sheet.
